DETAILED ACTION

Allowable Subject Matter

1. Claims 2-9, 12-21, 34, 35, and 37 are allowed.
2. The following is an examiner's statement of reasons for allowance: After searching through patent and non-patent literature, there was no evidence that there exists a limitation in direct relation or an obvious variant to the limitations of:

CLAIM 5

“wherein percolating the relevance scores comprises the steps~ :

for each child discourse constituent node in the structural representation, assigning the relevance score of the child discourse constituent node to the parent discourse constituent node if the child discourse constituent node is more relevant;

for any subordinating nodes, assigning the relevance scores of the subordinated discourse constituent to the subordinating discourse constituent if the subordinated discourse constituent is more relevant; and

for any coordination nodes, assigning the relevance score of the most relevant child to other child discourse constituent nodes”

Similarly, CLAIM 6

“wherein percolating the relevance scores comprises the steps of:

for each child discourse constituent node in the structural representation, assigning the relevance score of the child discourse constituent node to the parent

Art Unit: 2626

discourse constituent node if the child discourse constituent node is more relevant than its parent;

for each coordinated discourse constituent node, assigning the relevance score of the coordinated discourse constituent node to each preceding less relevant sibling node; for each child discourse constituent node that is not a coordinated discourse constituent node and is not a subordinated discourse constituent node, assigning the relevance score of the parent discourse constituent node to the child discourse constituent node if the parent discourse constituent is more relevant than the child;

for each coordinated discourse constituent node, assigning the relevance score of the parent discourse constituent node to the coordinated discourse constituent node, if the coordinated discourse node and all its siblings are less relevant than the parent node”

3. Further, all arguments directed to claims 2-9, 12-21, 34, 35, and 37 were considered in light of the specification and is believed to overcome the current references used for rejection, particularly the closest:

Marcu et al U.S. PG PUB 20020046018 (herein after Marcu)

Corston et al. US 6901399 B1 (hereinafter Corston)

Marcu in view of Corston describes summarization techniques, but fails to teach or suggest the percolation of scores in such a manner as that claimed, wherein

subordinated and coordinated parent and child nodes are not present in the teachings of Marcu in view of Corston and would not have been obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
